Suicide

Cemal Cicek

23 July 2018

The past is already past.
Don't try to regain it.
The present does not stay.
Don't try to touch it.

The future has not come;
Don't think about it
Beforehand.

Whatever comes to the eye,
Leave it be.
There are no commandments
To be kept;
There's no filth to be cleansed.

With empty mind really
Penetrated, the dharmas
Have no life.

When you can be like this,
You've completed
The ultimate attainment.

Layman P'ang

About the author	413

Suicide :

If you want to discover something in astrology, you have to find the associated axis (planet pair). For example, if we want to find cause of death, then we have to investigate Mars / Saturn axis. Then we can find cause of death. if we are looking for marriage then Venus / Node for divorce it is Venus / Neptune and so on.

If we want to find out if anyone will be king, then we'll look at Jupiter / Saturn Axis whether his AC or sun is on this axis.

For example, Charles, Prince of Wales has in sidereal Harmonic-4 JU/SA = SU/NE= SA/PL that is clear he suffers very much (SA/PL) that he will not be king (SU/NE).

Prince William has JU/SA = SU = AP (Aries Point)

You can also say with solar and lunar which year and month he will be king.

Without knowing any associated axis and looking for something does not bring anything, will remain as speculation and will not work in many cases and at the end we have nothing.

First, we need to define the event correct so that we can assign the planets. The planet allocations must be also correct too.

Suicidal thoughts (Mercury) are a compulsive (Node) desire (Moon) to leave the life (Mars/Saturn). The thoughts (Mercury) and psyche (Moon) are with death (Mars/Saturn) eclipsed (Node).

♂/♃ =	$\begin{array}{l} \text{♃} / \text{♁} \\ \text{♃} / \text{♄} \\ \text{♁} / \text{♄} \end{array}$
-------	--

If it is a suicide, then at least one of the above equations should occur.

But if ♂/♃ = ♀/♁ occur, then it is a murder case if there are doubts e.g. Stephen Paddock. Except those who kill themselves because of cancer e.g. Arthur Koestler, Margaret Laurence or by assisted suicide e.g. Menno Ter Braak and Eberhard Von Brauchitsch.

This event can also be used as birth time correction or control when there are two different birth times e.g. Luis Emilio Recabarren, Robin Williams.

This work is intended for psychologists and psychiatrists so that they can foresee if the patient has a suicidal tendency, if so, when is it acute ? ,can determine year and month even the day and take measures.

Used :

1-Sidereal zodiac (Krishnamurti Ayanamsa), Mean Node.
23°45'56" for Year 2000. Speed of precession is 50.2388475.

2-Progressions Keys :

Tertiary I: 1 sidereal day = sidereal month (27.321661 days)

Rate : $0.99726966 / 27.321661 = .036501062655012$

Tertiary II (Minor) : 1 sidereal month = 1 sidereal year

Rate : $27.321661 / 365.25636042 = .074801328493181$

Secondary Progression : 1 sidereal day = 1 sidereal year

Rate : $0.99726966 / 365.25636042 = .002730327978008$

3-Transit, Solar, Lunar, Progressed Lunar are used.

4-Last New Moon before the event.

One can take last moon phase before the event too.

5- Harmonics : Up to Harmonic-64 (5° 37' 30'')

Zet Settings :

a sidereal day (23h 56m 4.091s)

a sidereal month (27d 7h 43m 11.47s)

a sidereal year (365d 6h 9m 9.5s)

The birth times most examples in this work are rounded. That means they are not exact to the minute.

Because in suicide the Moon plays a big role next to Mercury and Node had to be used small Harmonics, because the speed of the moon.

I hope harmonic-64 for some astrologers a bit more imaginable than harmonic-1024 or harmonic-262144. The many astrologers will anyway look at the stars only with their eyes, even though new telescopes (2ⁿ Harmonics) have been discovered.

Ebertin started with harmonic 4, and continued with harmonic 8 and the Hamburg School uses Harmonic 16. Here we slowly start with harmonic 64, maybe so that we can come to harmonic 4096 and 65536 after 500 years, if everything goes well and if we see the wood for the trees.

Not considered or examined because of keep the overview ,but otherwise also need to be checked, are :

a-Progression to progression(e.g. Secondary to Tertiary or Solar to Tertiary and vice versa)

b-Solar to Lunar and vice versa

c-Midpoints of two planets in two different progressions (e.g. Solar Pluto/Lunar Neptune)

d-Sums and differences of Planets

True Node vs Mean Node :

Richard Houck wrote in his book Death in Astrology:

“It seems sometimes True Node be right sometimes Mean Node”

This dilemma will follow you on many topics if you only use a normal horoscope.

But if you use 2ⁿ Harmonics as I show you, you will be 100% sure what is right and what is wrong.

In my “Astrological Research Marriage-Divorce” many examples with mean node.You can check with True Node if you want, provided you accept that Venus/Node is marriage.

Agutte, Georgette

17 May 1867 at 03:30 (= 03:30 AM)Paris, France, 48n52, 2e20
French painter.
